Struggling to Keep Up with the Regulatory Process?

What if managing the process were easier?

Introducing the Office of Licensing and Compliance — your complete solution that helps you manage the regulatory process to your advantage.

For more than 28 years, licensing and compliance professionals have trusted Certrec for support in obtaining and maintaining their NRC license.

In this time of rising regulatory demands, resource restraints, and the loss of “tribal” knowledge due to workforce retirement, Certrec’s Office of Licensing and Compliance (OLC) allows you to better:

- ➔ **Maintain the Operating License**
- ➔ **Manage the Impact of the Regulatory Process**
- ➔ **Manage Communication with Multiple Regulators**

We’ve Walked in Your Shoes

Certrec’s Office of Licensing and Compliance (OLC) is a suite of services, regulatory compliance web-based tools, and expertise from nuclear professionals with more than 1,000 combined years experience operating plants, managing regulators, and improving safety performance.

OLC experts are integral participants in Regional Utility Groups (RUG) and industry advocates with the NRC. Many are leaders in their discipline, have INPO and NEI experience, and all deeply understand the intricacies of regulatory compliance and licensing.

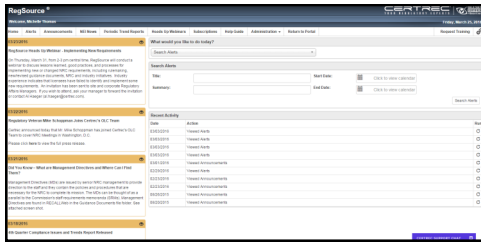

Because we’ve walked in your shoes, you are assured of regulatory compliance solutions, tools, and advice that are proven, efficient, and effective.

“I want to complement Certrec on the RegSource® daily newsletter. This is a fantastic reg OE resource. I have been sharing it with some of the site leadership and have received very positive reaction.”

-Reg Services Mgr, DCP

OFFICE OF LICENSING AND COMPLIANCE

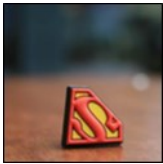

REGSOURCE®

As the Office of Licensing and Compliance's premier solution, RegSource® is the industry's first and only, web-based Licensing and Compliance management solution for your entire organization. RegSource® puts NRC standards, regulations, and rulings at your fingertips. Daily, real time notification of what's important, along with expert analysis of NRC activities, solves the "too much information/I can't find the information" issue many struggle with.

Additionally, Recall® offers access to the Public Legacy Library. This NRC collection contains hundreds of thousands of documents including correspondence, regulatory guidance and requirements, NUREGs, topical reports, safety evaluations, technical documents, and many others. Lastly, RegSource® gives you the system to manage your Licensing Basis in real time, plant wide.

"With the NRC microfiche, the ADAMS library, and our electronic document library, Certrec has the complete docket file for every US nuclear facility at its fingertips," says Ted Enos, Certrec President.

CONFIDENCE IN OUR TEAM

- Core of high-performing regulatory experts and leaders service OLC clients on a daily basis (Conly, Haeger, Heffner, Lahti, Madden, O'Keefe, Peschel, Reidmeyer, Tipps)
- We're more than a "body shop," providing access to high-quality experts with proven customer satisfaction for consulting projects
- Dedicated and responsive customer support

PARTNERSHIP FOR PERFORMANCE

- Experienced Project Manager assigned to your site and focused on your performance
- We go beyond "responses," with an ongoing presence to anticipate your needs and identify vulnerabilities
- We go beyond "data," by providing insights, analysis, and completed work products
- We will make a site-wide impact on regulatory awareness and sensitivity

SOLUTIONS THAT WORK

- ISO-certified information security management system (ISO 27001:2013)
- Dedicated IT team and infrastructure
 - Web-based applications, that don't rely on client software or configuration
 - Nimble and responsive solutions development
 - 99.99+% web tool customer availability
